The English Department announces

The DePhillips Great Courses Essay Contest

The Great Courses Series presents audio and video lectures covering a wide range of academic topics, from music to economics to chemistry. Through the generous donation of ALC benefactor Mr. Willard DePhillips, our students have access to these materials. This essay contest asks students to use the video lectures to pursue topics of interest to them for individual study and writing. Generous cash awards are available for the best essays.

The focus for this year's contest will be humanities courses. Students may view and incorporate lectures from the areas of music, literature, art, and philosophy. Video lectures can be accessed at the McGaw Library. They may be checked out, for one week, using a valid student ID.

Submission deadline: **Monday, March 26**. Submit a hard copy of your essay to the English Department by **4:00 pm**.

Criteria for Submission:

The essay must:

Be at least eight pages long, but no more than twelve pages.

Use the video lectures and course guidebooks as support.

Cite at least three video lectures.

Guidebooks contain a lecture synopsis, outline, and questions to consider for each topic.

Be based upon the "questions to consider" for each lecture provided in the course guidebooks.

Demonstrate a clear thesis, strong development and support, effective organization, awareness of academic audience, and clear, grammatically correct prose style.

Provide adequate documentation of video courses and guidebooks, using a documentation style appropriate to the discipline of focus.

Use no more than three additional sources. Any source employed must be of sound academic quality.

Contain no plagiarism. Any incidence of plagiarism in the essay will result in automatic disqualification.

Be formatted in Times New Roman 12 point font, typed and double spaced.

Judging to be done by selected panel of faculty. Winners will be announced on Honors Day, Tuesday, April 10.

Riddle Answer:

The key to the solution is the fact that "6" and "9" are the same character. One cube would contain the numbers 0,1,2,3,4, and 5. The other cube would contain the numbers 0,1,2,6,7, and 8. Even though there is no day "00" a zero is needed on both cubes in order to make all of the days between "01" and "09". There are many alternate configurations that also will produce all of the days of the month.
