Riddle ????

Two Trees And An Island
 You are standing at the edge of a lake. The lake is five hundred feet in diameter and there is a small island directly in the Middle of the island. You cannot swim and you have a little over five hundred feet in rope. How can use the rope as a means to get to the island in the middle of the lake?

Answer on Last Page

The McDowell Professional Pharmacy staff will be on campus on September 27th beginning at 10:00 a.m. to provide Flu, Covid or other immunizations to staff and students. They will be located in the DSC 2nd floor Conference Room. Contact ALC nurse, Margaret Duff at 368-6122 if you have questions.

Baer has many toys but he seems to like this one best.

All you nations, praise the Lord. All you people on earth, praise him. Great is his love for us. The Lord is faithful forever. Praise the LORD.

Campus Gas System
Public Awareness Notification
Post Date: FALL 2023

As a Master Meter Operator, Alice Lloyd College wants to ensure natural gas service to all consumers on campus. In doing so, we want to ensure the consumer that the pipeline system at the time of installation was in accordance with the natural gas supplier and is being maintained with the same integrity.

Being a Master Meter Operator, Alice Lloyd College wants the consumer to be informed of potential hazards and preventive measures taken by the supplier to secure the integrity of the pipeline system. Listed below are potential hazards and methods of prevention:

Potential Hazards

- Leaks
- Corrosion
- Dig In's

Preventive Method

Leakage Survey, Patrolling, Odorant Test
Corrosion readings
Member of KY 811 Program

Maintenance personnel work diligently to maintain the integrity of the pipeline system. The following procedures are conducted in a timely fashion to ensure safety and security to the consumer:

1. Weekly Sniff Test and Chart Reading at Master Meter.
2. Line Patrolling.
3. Up-Keep of Gas Risers and Regulators.

Assisting Alice Lloyd College in responsibility to the consumer is Moore's Pipeline Service. Moore's Pipeline Service is owned and operated by Mr. Jack Moore. Services provided by Moore's Pipeline Service are listed as followed:

1. Annual Leakage Survey.
2. Pipeline Patrol.
3. Education and Re-Certification of Maintenance Personnel.

All records pertaining to the gas system are on file at the Office of Physical Plant including the Public Service Commission Report.

You the consumer can play a vital role in protecting our campus community. Detecting a leak and knowing what to do if a leak is suspect is at the utmost importance. When it comes to detecting a gas leak, it's best to trust your senses:

Smell: To help you smell natural gas leak, a familiar odor like rotten eggs is added to gas.

See: Near a gas leak, you might see blowing dirt, bubbling water or an unusual area containing dead vegetation.

Hear: A leaking pipeline might make a hissing sound you can hear.

If you suspect a natural gas leak, do the following:

- Walk away. Leave the area immediately. **DO NOT** try to find or stop the leak.
- **DO NOT** do anything to create a spark, like lighting a cigarette, using a cell phone, starting a car, or turning on or off lights.
- Call one of the following Alice Lloyd College personnel and 911.

SOLUTION TO THE RIDDLE:

First, tie one end of the rope to the tree next to you. Then, while you are holding the other end of the rope, walk all the way around the lake. This will wrap the rope around the tree in the center. When you return to your starting point, tie the end of the rope you are holding to the large tree. You can now use this makeshift rope bridge to hold on to and cross the lake to the island.
