My brethren, count it all joy when you fall into various trials, knowing that the testing of your faith produces patience.

James 1:2-3

Be faithful in small things because it is in them that your strength lies.

Mother Teresa

You have reached the pinnacle of success as soon as you become uninterested in money, compliments, or publicity.

Thomas Wolfe

The past is a place of reference, not a place of residence; the past is a place of learning, not a place of living.

Roy T. Bennett

Riddle

????

Rope Burning

You have a lighter and two ropes. Each rope takes one hour to burn completely. Both ropes have varying thicknesses, meaning that different parts of each rope burn at different speeds. How can you accurately time forty-five minutes with just the two ropes and the lighter?

Answer on last page

You have enemies? Good. That means you've stood up for something, sometime in your life.

Winston Churchill

Clari-Jane Newman,
Student Editor

It seems that no one was able to avoid the snow...not even Baer!

Come and get it!

Riddle Solution

Rope Burning

The key to this solution lies in what happens when you light the ropes from both ends. If the ropes take one hour to burn completely, then when you light a rope from both ends it will take half the time because the consumption rate of the fire is doubled. To time forty-five minutes, you must do this: Light the first rope from both ends and the second rope from just one end. Once the first rope is completely burnt, you will know that thirty minutes have gone by and you will know that the second rope has thirty minutes of time left before it burns completely. As soon as the first rope is completely burnt you light the other end of the second rope, which will double the rate of consumption and cut the remaining time in the rope in half, meaning that it will only take fifteen more minutes for the second rope to burn out completely. The thirty minutes from the first rope and the fifteen minutes from the second rope gives you forty-five minutes.
